

PROVigil™

Roof Protection Program

Introducing ProVigil™ Roof Protection Program

Exclusively available from Texas Fifth Wall Roofing, the ProVigil Roof Protection Program is designed to extend the serviceable life of your roofing system and reduce service and repair costs.

Even the best roofing systems are susceptible to damage and premature deterioration, threatening not only the contents of the building but the relationship of valuable tenants.

The “maintenance free” roof simply does not exist.

Weather, careless service providers, oxidation and other factors can damage roofing membranes. Ignoring maintenance can cause minor problems to become expensive repairs and can void the manufacturer’s warranties.

ProVigil Roof Protection delivers comprehensive, proactive roof maintenance and inspections to keep minor repairs from turning into major losses.

What is ProVigil?

The ProVigil Roof Protection System is a low cost, preventative maintenance service exclusively offered by Texas Fifth Wall Roofing. We will perform regularly scheduled roof inspections, maintenance and minor repairs, debris removal and drain clearing. In addition, we will assess other rooftop concerns and make recommendations to protect you from the unexpected and deliver peace of mind to building owners, property managers and facility engineers.

Key benefits:

- Reduces risk of tenant issues resulting from roofing leaks and failure
- Reduces exposure to moisture related structural problems
- Extends the life of the roof asset
- Ensures tenant work is done as per manufacturers requirements and well established roofing practices
- Provides predictable costs for budgeting
- Documents compliance with warranty maintenance requirements

ProVigil offers building owners, facilities and property managers peace of mind by delivering proactive maintenance and roof asset management.
